ASL

Specialist Backup & Disaster Recovery Solutions

ASL have over 20 years of specialist knowledge in providing robust IT solutions to small and mid-sized UK businesses.

Regardless of company size, an effective backup & disaster recovery (DR) plan is vital. Losing data is a fundamental problem, but the failure to quickly restore that data can lead to serious consequences including but not limited to loss of earnings, customers and reputation. Business continuity can only really be guaranteed with professionally implemented and regularly tested backup & disaster recovery services.

We design and implement disaster recovery plans that minimise service disruption and financial loss, caused by unexpected IT outages.

Our services allow you to quickly recover all key IT systems, business applications and data, so that you can carry on with business as usual.

Why outsource your backup and DR strategy?

By outsourcing you gain access to the latest backup and data recovery technologies, which offers you the ability to save on:

- ✓ Hardware to act as backup servers
- ✓ Backup and software licence fees
- ✓ Man-hours wasted managing your own backups

We are specialist disaster recovery providers for major ERP systems including MS Dynamics GP/BC/AX, SAP Business One and Sage, we utilise the best technologies available including Veeam and Rapid Recovery.

Call ASL on **0345 862 0350** to discuss your managed backup and disaster recovery requirements in more detail.

Specialist Backup & Disaster Recovery Solutions

The benefits of a managed disaster recovery service

By outsourcing to us you can feel secure in the knowledge that your data is being managed safely, effectively and in a cost effective manner. We offer backup-as-a-service solutions to all sizes and types of business within the UK.

Our managed backup and disaster recovery service offers:

- Cost savings - no more backup technology upgrades
- Latest servers / hardware for disaster recovery at our secure datacentre
- Flexible backup schedules including near real-time
- Virtualisation - so complete offsite replication of data and systems
- Ability to increase storage capacity when needed
- Data safety and storage systems reliability

- Unlimited restore capabilities
- Increased flexibility and improved performance
- Access to Veeam engineers
- Rapid Recovery engineers
- Improved productivity freeing up staff to concentrate on other tasks

How much does this service cost?

We know that no two businesses are alike, which is why we offer a range of solutions. Prices start from £50 per server, per month. Ask a member of our team to provide you with an accurate cost for your business' unique needs.
